## Customer Reviews

This book by Kaled Hameide truly gives a complete and well-delivered overview of the process of fashion branding. The author explores the different concepts and strategies involved in the branding process in a way that is easy to understand and relate to. He also does an amazing job of posing questions and allowing the reader to understand the difficulties and challenges associated with the branding process. Considering the scope of the topic addressed, the delivery and progression throughout the book is easy to follow. The information is presented in a way that gives depth and contextualization for each of the areas discussed. The references he makes between chapters is very easy to follow and the knowledge presented in the book builds on itself. While most of the graphics and tables used were relevant to the topic, some (especially photos) did not necessarily illustrate the points that were made in the text. Dealing with a subject such as fashion branding of course lends itself to relevant exposure to the stylistic aspects of the industry. While creativity was

certainly addressed well in the text, due to the heavy focus on the social, economic, and business concepts related to branding, the photos of high fashion advertisement and runway shows were more difficult to explain in those contexts. Fortunately, they do not detract from the subject as much as they occasionally seem superfluous. Hameide's writing style is easy to follow and well-developed. Some familiarity with the fashion industry is necessary to place a lot of examples in the proper context, but he also poses new ways to understand the branding process that even a seasoned veteran of the industry would find interesting.
