# Contemporary Wedding Photography

## Synopsis

Wedding photography has become about story-telling&#151;capturing the emotions and atmosphere of the day through reportage-style photography. This user-friendly manual reveals the techniques needed to create this contemporary style, for professional photographers looking to update their methods, or for aspiring photographers wanting to break into this lucrative market. Includes all the advice you need, from preparation and planning before the wedding, to digital manipulation of your images and presentation to the couple. Features comprehensive checklists, professional tips, tried-and-tested templates, advice boxes and step-by-step sequences to provide endless inspiration and guarantee successful shooting. Demonstrates the fresh contemporary style preferred by modern couples.

inÂ Kindle Store > Kindle eBooks > Crafts, Hobbies & Home > Weddings #335 inÂ Kindle Store > Kindle eBooks > Arts & Photography > Photography > Portraits & Selfies

## Customer Reviews

I've started reading this book, and I mainly bought it because of the beautiful photos. The award winning authors shoot totally high end weddings, with examples of their work appearing on every page. The back cover says this book "Includes all the advice you need...." Well I certainly wouldn't say that, especially if you're a novice wedding photographer. This book is for getting at more artistic

wedding productions--using the type of shooting you find in fashion magazines. Though they don't seem provide enough information about how to set up and get shots, they do provide EXIF data on each of the photos in the book which provides you some ideas about the equipment they're using. The last few chapters deal with Photoshop strategies and wedding album creation, but these chapters are very lacking. They're mainly good introductions. Overall, it's a good book to have if you're looking to improve your wedding photography, but it's certainly not the only book you'll need.

The book was ok, but didn't give me as much info as I was hoping for. Needed more posing and light instructions. Was hoping when I bought the book would have some info on how to pose your clients. Bare amount on this..

One of the better wedding photography books I've purchased. Beautiful scenery in the shots. Book was published in UK. Some good ideas I intend to incorporate in my photography but nothing really new.

This book has a good deal of important information that would be helpful to any wedding photographer, but I just don't know what to think with the toned pictures. Honestly... Who in the world would want a B/W picture with a dark blue-green tint? Take away the crazy coloring and they actually do have some amazing shots in there.

Cool pics, poor material:( ... it's alright. You have to understand that I purchased over 7 books on wedding photography, so I have a decent amount of subjects to compare it to.
