This text is a really good resource for basic concepts of palliative care/end of life. The chapters are SUPER short (sometimes only one page!) It has some really good Evidenced-based practice recommendations (hence the title). I do recommend this text for those who are entering the palliative care field or who are in school learning about this topic.

This is one of the best resources for people trying to make the best decisions when it comes to palliative care. It's practical advice, based on evidence and provides clear clinical examples. Good
