## Customer Reviews

Dream Homes of Colorado is a "Must Have" Coffee Table Book. It is truly one of the finest compilations of magnificent photography of the finest examples of the architectural, design, and building talents used to produce the most outstanding homes in the State of Colorado. It showcases where almost everyone would live, if only they could.

With a plethora of building sites offering truly spectacular settings, as well as a busy metropolitan area, relatively low building costs, and resort areas to attract the rich and famous, Colorado offers a collection of 'Dream Homes' unlikely to be found anywhere else in the world. In putting this book the authors could choose from the best of the best and they did. Both the houses and the background settings are spectacular. There's something about a huge mansion, sitting by a lake, with snow capped mountains in the background that creates a picture worth remembering. Of course the houses are outstanding in their own right. Most of the houses, especially those remote from the city of Denver, carry a western motif, there's something about being in the west that calls for big wooden beams, log cabin construction, and wrought iron inside. Still, as you would expect, there is room for

other architectural style, whatever the customer wants: tudor, French, modern - anything goes. The one common characteristic is that these homes all fill every aspect of being a dream home.
